### **DETAILED ACTION**

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-11 and 50-54, drawn to an apparatus for the rapid evaluation of a plurality of materials comprising an array of crystals remotely coupled to a plurality of oscillation devices, classified in class 422, subclass 50.
- II. Claims 12-25, drawn to a method for enhancing the stability and the selectivity of each of a plurality of sensors, classified in class 422, subclass 105.
- III. Claims 26-49, drawn to an apparatus and method for the rapid evaluation of the extractability of materials from a plurality of samples, classified in class 422, subclass 188.

The inventions are distinct, each from the other because:

The inventions of Groups I – III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions of Groups I, II, and III are directed to different and distinct components and process limitations as summarized above and document the undue search burden if they were searched together.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Art Unit: 1631

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
